

Turkey's First Domestic Air Leak Detection Device: Borvision L1

With a history spanning over 40 years, BORLED—operating under the Borsan Group, a leading force in Turkey's domestic industry—has pioneered a revolutionary innovation that digitises energy efficiency in industry. Developed by BORLED, the Borvision L1 detects leaks in compressed air systems. The Borvision L1 is the first and only domestically produced device of its kind in this field.

The fact that approximately 20–30 per cent of compressed air in industrial facilities is lost through undetected leaks creates a massive, invisible cost for businesses. BORLED's new technology enables the real-time monitoring of these losses without halting production or relying on human senses, thereby facilitating preventive measures.

Air Leak Detector

Real-time Precise Measurement

Unlike portable devices, the BORLED Borvision L1 can analyse leaks in real time even in noisy industrial environments thanks to its high-precision sensors.

Digital Transformation: Provides a digital data processing and reporting infrastructure aligned with Industry 4.0 objectives.

Sustainability: By preventing unnecessary energy consumption, it reduces the carbon footprint and contributes to businesses' 'Green Transition' goals.

A Strategic Efficiency Investment That Pays for Itself in No Time

For industrial facilities, the BORLED Borvision L1 is far more than just a measuring device; it serves as a strategic investment tool that directly reduces electricity costs and pays for itself in a short space of time.

Cost and Operational Benefits: Reducing air leaks lowers the compressor load, reduces maintenance costs and ensures production continuity.

Local Manufacturing Capability: As the products are manufactured locally, this offers lower costs, rapid service support and incentive benefits, thereby shortening the payback period on the investment.

Competitive Edge: By providing businesses with a sustainable cost advantage, it enhances their competitive strength in the global market.

Why Borvision L1?

Lower energy bills

Greater efficiency

Quick and easy to use

100% home-grown technology
